

Fire Suppression System & Kitchen Hood System Application Requirements

The following items must be submitted to the building department at time of application:

1. Three sets of shop drawings that include all requirements listed in NFPA standards.
2. Three sets of hydraulic calculations that comply with NFPA requirements.
3. Copy of a mechanical contractor license with (Fire Suppression) certification.
4. A completed mechanical permit application.
5. A \$100.00 non-refundable deposit.

Plan reviews will take from one to two weeks if the plans are reviewed in house. If the plans are sent to a consultant, review time will be between two and four weeks.
