Greendale Health Department

November 2022

Radon gas can't be seen, smelled, or tasted and is the leading cause of lung cancer in non-smokers. Stay tuned for information about a "Radon Gas and Your Home" presentation from

SE WI Radon Information Center. The Greendale Health Department has Short-Term Radon Test Kits available for residents.*

Beyond the Fog

Based on local data, reports and national statistic, vaping is a concern, especially in the youth. The Health Department is available to help share information and facts or help you or your child create a "Quit Plan".

"Disrupting Aging"

...one dinner conversation at a time. Individuals of all ages were brought together to discuss a variety of topics, giving an opportunity to learn from one another and to find common interests and perspectives despite the age difference. Thank you AARP WI for providing this opportunity.
